About

We introduce ourselves as Sunguard Glass & Aluminum Installation Company, formed by a dedicated group of experts with a proven track record of longstanding skill and capability.

We work in close association with consultants, contractors, designers, home and business owners etc., transforming their ideas and imaginations into reality. Our state-of-the-art 7000 sq. ft. Fabrication Facility, centrally located at Qusais Industrial Area 4, utilizes the latest technology and our experienced Fabrication Engineers guarantee technical accuracy, while at the same time producing aesthetically pleasing outcomes.

Sunguard Glass & Aluminum maintains at its core, a focus on servicing the construction and building industry, offering products and services such as: Aluminum Architectural Cladding, Curtain Walls, Silicon Glazing, Doors, Windows, Skylights, Aluminum Paneling, Handrails, and Shop fronts etc. We have established our name in the marketplace by executing numerous projects, ranging from simple windows and doors, to the most complex and complete aluminum and glass systems.

SUNGUARD
GLASS & ALUMINUM INS.

Sunguard's Mission is committed to providing professional customer service, maintaining the highest standard of workmanship.

Our promise is to ensure that prices remain competitive and that projects are completed within the agreed time frames.

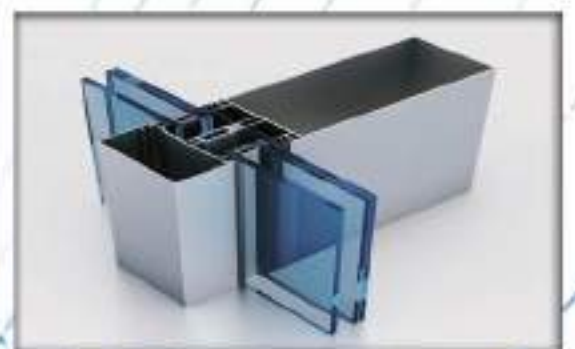

Our Projects

We offer a range of doors suitable for the architectural, commercial, public, newbuild and retail markets. The doors available include commercial hinged, commercial swing, revolving doors, patio, tilt and slide, slide folding, multi-track slide, electronic and automatic. Our doors are designed for use as open out or open in, single or double doors, internally or externally beaded with sidelight options for both domestic and/or commercial applications.

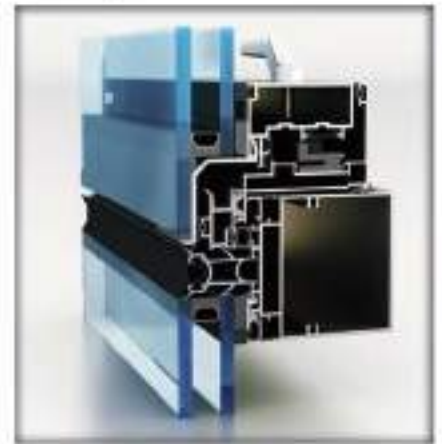

Our products include aluminum panels, available in a wide range of models and colours. Optionally, glazing can be replaced by a tilt and turn window, which can provide excellent value for money. Our sealed, mechanically joined corners stay square and true over years of use. The frames come in all standard sizes, with any non-standard frames made upon request.

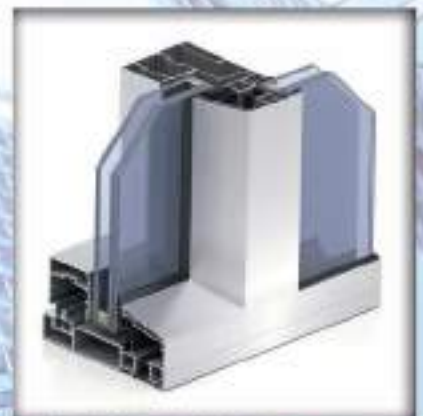

Our Projects

Let the light pour in from the sky, thermally improved aluminum skylights come in both fixed and custom models. Our strong, durable aluminum frames will maintain their appearance and will not rot, peel or require paint; and provide an excellent alternative to plastic skylights, which may degrade over time. Hidden drainage systems drain moisture without unsightly openings and are designed to prevent air and water infiltration that causes drafts and leakage.

An aluminum fence offers the beauty and protection of traditional wrought-iron fencing without the maintenance. They are available in a wide variety of styles, colours and heights, that add prestige and value to any property. No other fence will do so much to enhance your home, pool, or commercial project by using visually appealing mesh patterns and adding horizontal rails for a truly ornamental appearance.

The pergola system was conceived to respond to the need of outdoor lifestyle. Easy to assemble and install, the pergola can resemble the original classic, wooden one or with the use of polycarbonate sheets as cover, it becomes an ornament to a modern home. Pergola is available in a variety of RAL and RAFA-ELLO colours, as well as imitation wood shades, and it is above all, certified by seaside class standards for maximum protection and with no need for maintenance.

Balcony railings and outdoor stair railings provide a unique appearance and durability to the various environmental conditions. Suitable for modern houses and commercial buildings, outdoor hotel cites (such as balconies, pools etc.) and public places. Indoor stair railings for use in residential and commercial building interiors (such as hotels, restaurants, coffee shops etc) offer a special sense of high aesthetics.
